

## 2022 Frequency Report

---

Sample Institution

# Understanding the Frequency Report

The Frequency Report contains questions with fixed response options. For more detailed information, the Codebook contains a complete list of survey questions and response options. Each page breaks data down into four groupings: undergraduate alumni, graduate alumni, all alumni from your institution, and all alumni from the 120 institutions participating in the 2022 SNAAP survey.

### Your Respondents

The number and percentage of your alumni selecting a certain response for each question.

### Topic Area

Each section represents a different topic area of the SNAAP Questionnaire.

### Comparison Groups

Each of the four columns displays the number and percentage of alumni that fall into that comparison group. From left to right, the columns represent: undergraduate alumni from your institution, graduate alumni from your institution, total alumni from your institution, total alumni participating in the SNAAP 2022 survey (including your institution). If a category does not apply to your institution (for instance, if you do not have graduate alumni) that column will be filled with zeros.

### Questions

An abbreviated version of the questions on the SNAAP Questionnaire.

### Response Options

Response options for each particular question.

### Institution, College, or Department Fill

Questions that reference the "institution/college/department" were customized using the institution's choice. Alumni were asked about their overall institution, their college/school, or their department, depending on which unit the institutional contact chose prior to the survey administration.

### Italicized Response Options

Due to the dynamic nature of the SNAAP Questionnaire, not all alumni received every question. This italicized line (or lines) indicates the number and percentage of alumni who did not receive the question. For more detailed information on why they did not receive each item, please see the Codebook.

### How to Interpret Percentages

All percentages are presented as the percent of all alumni at a given education level, including those that did not receive the question.

For example, here we might say that 44% of all Sample Institution's undergraduate alumni rated their overall experience at the institution as "excellent."

**Note.** Open-ended questions can be found in the "Alumni Comments" Report. Demographic items can be found on the "Respondent Characteristics" Report.
