

2022 Frequency Report: Recent Graduate Comparisons

Sample Institution

Understanding the Frequency Report for Recent Graduates (RG)

The Frequency Report contains questions with fixed response options. For more detailed information, the Codebook contains a complete list of survey questions and response options. Each page breaks data down into four groupings: alumni who graduated within the past three years, five years, ten years, and all alumni participating in the SNAAP 2022 survey from your institution

Your Respondents
The number and percentage of your alumni selecting a certain response for each question.

Topic Area
Each section represents a different topic area of the SNAAP Questionnaire.

Comparison Groups
Each of the four columns displays the number and percentage of alumni that fall into that comparison group. From left to right, columns represent alumni who graduated within the past three years, five years, ten years, and all alumni participating in the SNAAP 2022 survey from your institution. The total alumni across the first three columns will not equal the institution total due to the overlap across years. For instance, alumni who graduated within the past three years also graduated within the past five and ten years, and thus will be included in all three groups.

Questions
An abbreviated version of the questions on the SNAAP Questionnaire.

Response Options
Response options for each particular question.

Institution, College, or Department Fill
Questions that reference the "institution/college/department" were customized using the institution's choice. Alumni were asked about their overall institution, their college/school, or their department, depending on which unit the institutional contact chose prior to the survey administration.

Italicized Response Options
Due to the dynamic nature of the SNAAP Questionnaire, not all alumni received every question. This italicized line (or lines) indicates the number and percentage of alumni who did not receive the question. For more detailed information on why they did not receive each item, please see the Codebook.

		Total	189	100%	319	100%	621	100%	1,768	100%

How to Interpret Percentages

All percentages are presented as the percent of all alumni at a given education level, including those that did not receive the question.

For example, here we might say that 25% of all Sample Institution's alumni who graduated within the last three years are very satisfied with opportunities to

Note. Open-ended questions can be found in the "Alumni Comments" Report. Demographic items can be found on the "Respondent Characteristics" Report.
